Senate Bill 200
Informational Inquiry

Senate Bill 200 on Computer Science Education has many components to it that the Computer Science Subcommittee, of the Governor's STEM Advisory Council, would like to address.

We have put together a slide deck outlining the key points of Senate Bill 200 and why Computer Science education is so important for our students. We start with an overview of SB 200 and then go into detail on each point. We follow up with a timeline for each provision outlined in the bill. More details may be found on the Nevada Department of Education's Computer Science page at http://bit.ly/CSforNV-NDE

We are putting together an FAQ sheet for Senate Bill 200 and would like your help in formulating that document.

Please review the associated informational slide deck and respond with any lingering questions you may have about ANY Nevada K12 Computer Science Education initiatives. We want to be able to address any and all concerns from the field. Please email your questions directly to Cindi Chang at cchang@doe.nv.gov.

We appreciate all that you do for our students in Nevada and for your time in this matter.

Best Regards,

Computer Science Subcommittee
of the Governor's STEM Advisory Council
