

Nevada STEM Program Recognition Rubric K-12

		<p>Exploratory</p> <p><i>The Exploratory STEM program describes a school program that has intermittent STEM-related opportunities for students.</i></p>	<p>Developing</p> <p><i>The Developing STEM program describes a program that provides STEM- related experiences for students in specific classes or instructional settings as part of the daily schedule.</i></p>	<p>Established</p> <p><i>The Established STEM program describes a school where STEM- related experiences are provided for ALL students in the program in many instructional settings as part of the daily schedule.</i></p>	<p>Model</p> <p><i>The Model STEM program describes a school where STEM-related experiences are provided for ALL students within the program and are integrated in all instructional settings throughout the school day. This may be realized through a non-traditional daily schedule.</i></p>
<p>Categories</p>	<p>Attribute</p>				
<p>Curriculum Practices</p>	<p><i>Degree of integration of the scientific, technological, engineering and mathematical practices.</i></p>	<p>STEM practices may be integrated into curricular opportunities for some students with or without technology and engineering design integration.</p>	<p>STEM practices are partially integrated into some instructional settings for ALL students in the program as part of daily instruction with technology integration and minimal engineering design .</p>	<p>STEM practices are integrated into daily instruction for ALL students in the program with technology integration and engineering design.</p>	<p>STEM practices are fully integrated into daily instruction for ALL students in the program throughout the school day in a scientific, technological, engineering, and mathematical learning environment.</p>
	<p><i>Students use appropriate problem solving practices to develop multiple solutions and communicate their ideas both orally and in writing, with argumentative support.</i></p>	<p>Teachers guide students through engineering processes to discover problems have multiple solutions.</p>	<p>Students are supported by the teacher to apply content knowledge and compare multiple solutions using evidence.</p>	<p>Students are persistent in applying content knowledge from multiple subject areas to implement solutions and communicate them both written and orally.</p>	<p>Students are persistent in applying content knowledge from multiple subject areas to implement solutions and support argumentation.</p>
	<p><i>Ethical considerations are part of the decision making process.</i></p>	<p>Teachers identify that ethical considerations are a part of decision making.</p>	<p>Teachers encourage discussion of ethical considerations among students.</p>	<p>Students explain ethical considerations associated with global problems.</p>	<p>Classroom operations and student work clearly use consideration of ethical tradeoff.</p>
<p>Curriculum Integration</p>	<p><i>Degree of integration of</i></p>	<p>STEM and non-STEM practices may be</p>	<p>STEM and non-STEM practices are</p>	<p>STEM and non-STEM practices are</p>	<p>STEM and non-STEM practices are</p>

	<i>STEM content within classroom instruction with non-STEM content areas such as Art, PE, English Language Arts, Social Studies, and Health.</i>	integrated into curricular opportunities for some students with or without technology and engineering design integration.	partially integrated into some instructional settings for ALL students in the program as part of daily instruction with technology integration and minimal engineering design .	integrated into daily instruction for ALL students in the program with technology integration and engineering design.	fully integrated into daily instruction for ALL students in the program throughout the school day in a scientific, technological, engineering, and mathematical learning environment.
Learning Environment	<i>Degree of fair and equitable access to a STEM-related experience for ALL students in a culture that is welcoming, stimulating, and nurturing.</i>	STEM-related experiences are equitable and accessible and are partially integrated into instruction for ALL students in a welcoming environment.	STEM-related experiences are equitable and accessible and are integrated into instruction for ALL students in a welcoming and stimulating environment.	STEM-related experiences are equitable and accessible and are integrated into instruction for ALL students in a welcoming, stimulating and nurturing environment.	STEM-related experiences are equitable and accessible and are fully integrated into instruction for ALL students in a welcoming, stimulating and nurturing environment.
STEM Instruction	<i>Degree in which teachers are facilitators of independent student learning, providing high quality cognitive tasks and higher-level questioning during a STEM-related experience.</i>	Teachers guide STEM-related learning opportunities offered to students with minimal independent student learning that include a small number of high-level cognitive tasks and questioning.	Teachers guide STEM-related learning opportunities offered to students in group situations with limited independent student learning that includes some high-level cognitive tasks and questioning.	Teachers facilitate STEM-related learning opportunities offered to students in group situations with greater independent student learning that includes high-level cognitive tasks and questioning.	Teachers are facilitators of collaborative groups in STEM-related learning experiences with independent student learning that includes high-level cognitive tasks and questioning.
	<i>Students work collaboratively to solve engineering problems.</i>	Teamwork in the classroom takes place weekly, team roles are not defined.	Teams exhibit evidence of defined roles and include 2-3 members.	Students exemplify cooperative teamwork daily and teams consist of 3-4 members.	Student teams of 3-4 members design complete solutions to age appropriate difficult and unfamiliar problems.
	<i>Students will participate in a STEM program</i>	Students are evaluated	Students are evaluated through assessment in	Students show some growth through	Students show significant growth

	<i>recognized at the local/state/national levels</i>	through assessment.	specific learning environments.	assessment in STEM-learning environments and on school / state / nation wide assessments.	through assessment in STEM-learning environments and on school / state / nation wide assessments.
STEM Integration	<i>Teachers and students recognize the importance of postsecondary institutions to career development.</i>	Teachers and students understand postsecondary institutions as a part of the educational system in which they participate.	Students identify postsecondary institutions as possible route for their own educational development.	Students and teachers recognize a need for educational and career goals.	Students identify career goals and possible educational pathways to reach the goals.
	<i>Teachers and students recognize the importance of curriculum (curricular) choices to future career development and preparation.</i>	Teachers and students understand appropriate course selection will help prepare students for opportunities in a STEM career.	Students recognize a need for educational and career goals.	Teachers help students identify courses of study as possible routes for their own educational development.	Students identify career goals and possible educational pathways to reach the goals.
	<i>Students understand and find solutions to local problems within the community.</i>	Teachers identify local problems and their relationship to the community.	Teachers explain how local problems impact the community.	Students understand how the community can solve local problems.	Students explain multiple-solution approaches to community problems.
Leadership	<i>Degree in which administrators support STEM-related experiences within the school such as scheduling, funding, teacher time for collaboration, and opportunities for professional learning.</i>	Administrators minimally support STEM-related experiences within the school to include collaborative time for teachers and STEM related professional learning opportunities.	Administrators partially support STEM-related experiences within the school to include collaborative time for teachers and STEM related professional learning opportunities.	Administrators mostly support STEM-related experiences within the school to include collaborative time for teachers and STEM related professional learning opportunities.	Administrators fully support STEM-related experiences within the school to include collaborative time for teachers and STEM related professional learning opportunities.
	Administration and teachers provide	Administration and teachers identify	Administration and teachers collaborate	Administration and teachers apply	Administration and teachers encourage

	experiences for STEM related career awareness.	opportunities to collaborate with the local industry and community.	with the local industry and community to provide interactions with students	collaborative principles to form industry and community partnerships.	experiences for students both outside and in the classroom to develop STEM related career awareness opportunities.
Stakeholders	<i>Degree of parent/guardian engagement and STEM partnerships collaboration, in support of the STEM- related experience within the school and/or classroom.</i>	Parents/ Guardians minimally participate in some STEM related experiences and/or a STEM partner occasionally assists with some STEM related experiences.	Parents/ Guardians sometimes participate in some STEM related experiences and/or a STEM partner assists with some STEM related experiences.	Parents/ Guardians usually participate in STEM related experiences and/or STEM partner(s) are usually involved in STEM related experiences.	Parents/ Guardians actively participate in STEM related experiences and STEM partner(s) are actively involved in STEM related experiences
	<i>Degree of STEM partnerships with community, industry, business, higher education, informal education, outdoor education, or afterschool programs.</i>	School has a STEM partner that occasionally assists with some STEM related activities.	The school has STEM partner(s) that sometimes support STEM related activities in specific classrooms.	The school has STEM partner(s) that often support STEM related classroom experiences.	The school has STEM partner(s) that actively support a STEM-centered school setting.
