USAC News Brief Dated July 31 – Troubleshooting MFA Access

As discussed in [last week's newsletter](#), USAC implemented a new multifactor authentication ("MFA") process on Monday, July 27th, requiring an additional security step to access the EPC and/or BEAR Form systems through USAC's new unified "One Portal". Applicants using the MFA process for the first time may find it useful to review our [illustrated version](#) of USAC's initial instructions.

For the most part, we have found that USAC's MFA process works well, but that some users have experienced problems. [USAC's Schools and Libraries News Brief of July 31, 2020](#), provides the following tips for troubleshooting MFA access issues:

- Verify that you have a One Portal account.
- Verify that you can receive the log in email.
- Review the requirements for your password.
- Act quickly when you receive your verification code (it's good for only 10 minutes).
- Check your entitlements.
- Create new users as usual.
- Ask for assistance if you need it by calling the Client Service Bureau (888-203-8100).
