GRADUATE MEDICAL EDUCATION GRANTS OUTCOMES REPORT 2015-2018

ABOUT THE GRANT PROGRAM

Nevada consistently ranks among the most underserved states in most areas of healthcare delivery, both in urban and rural settings, due in large part to shortages of physicians. Additionally, many graduates of Nevada's medical schools must leave the State to seek Graduate Medical Education (GME) since Nevada produces more undergraduate medical students than it has residencies and fellowships.

The State, through GME New and Expanded Program Grants, seeks to meet its growing healthcare needs and grow its physician workforce by increasing support for graduate medical training. \$10 million was allocated for grants over the last biennium for GME.

The Office of Science, Innovation and Technology (OSIT) manages a competitive grant program to award the funds to any ACGME-accredited institution in Nevada. OSIT convenes a GME Task Force made up of healthcare experts from across the State to evaluate applications and make recommendations to the Governor for funding. The Governor makes final funding decisions. Once funding decisions are made, OSIT oversees the award of funds and the reporting from grantees.
